

# FLEURINE RECALDE

## SENIOR FULL-STACK SOFTWARE ENGINEER

Philippines | fleurinerecalde@gmail.com | LinkedIn

### PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience building web applications across frontend, backend, APIs, databases, and cloud platforms. Strong production experience with TypeScript/JavaScript, Angular, Node.js, REST APIs, MongoDB, SQL, and Google Cloud Platform. Experienced in end-to-end ownership—from technical design and implementation to testing, debugging, deployment, and production support. Built a full-stack platform from the ground up using the MEAN stack and GCP, with additional hands-on exposure to Generative AI, LLM fundamentals, prompt engineering, and AI-assisted development.

### TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, PHP

**Frontend:** Angular, RxJS, NgRx, HTML, CSS, SCSS, reusable UI components

**Backend & APIs:** Node.js, Express.js, REST APIs, API integration, authentication, RBAC

**Databases:** MongoDB, MySQL, MS SQL, SQL

**Cloud & DevOps:** Google Cloud Platform (GCP), Docker, Git, GitHub

**AI / LLM:** Prompt engineering, LLM fundamentals, GitHub Copilot

**Engineering:** System design, state management, performance optimization, debugging, testing, code reviews, Agile

### PROFESSIONAL EXPERIENCE

#### Custom Software Engineering Specialist | Tech Lead | Accenture, Inc. | Jun 2026 – Present

- Lead technical solutioning for feature stories, translating business requirements into maintainable technical approaches and implementation plans.
- Build scalable and reusable UI components for enterprise e-commerce applications using Angular, TypeScript, JavaScript, HTML, and SCSS.
- Optimize application responsiveness and maintainability through RxJS and NgRx state-management patterns.
- Investigate application issues, perform code reviews, debug behavior, and drive application stability improvements.
- Collaborate across engineering and business teams to deliver production-ready features in an Agile environment.

#### Custom Software Engineering Senior Analyst | Accenture, Inc. | Jun 2022 – Jun 2026

- Developed and enhanced enterprise e-commerce features across frontend applications, API integrations, and commerce workflows.
- Applied TypeScript/JavaScript, debugging, testing, and Agile engineering practices across large-scale production applications.

#### Freelance Full Stack Developer | Resident Benefits Management System | Oct 2025 – Apr 2026

**MEAN Stack | MongoDB | Express.js | Angular | Node.js | GCP**

- Architected and deployed a full-stack resident benefits management platform from the ground up using MongoDB, Express.js, Angular, Node.js, and Google Cloud Platform.
- Owned the solution end-to-end across frontend, backend APIs, database design, authentication, RBAC, reporting, audit trails, and deployment.
- Designed REST APIs and access controls for a large resident dataset, with filtering and pagination to support efficient application use.
- Built QR-code workflows, administrative modules, reporting, user/role management, and audit logging.
- Made independent technical decisions across architecture, implementation, debugging, and production deployment.

#### Computer Programmer III | Department of Social Welfare and Development | Dec 2019 – Mar 2022

- Led design, development, installation, and maintenance of web applications and database-driven solutions using PHP, JavaScript, HTML, and CSS.
- Translated operational requirements into functional application features and database solutions.
- Performed software testing, debugging, monitoring, and SQL reporting; maintained applications used for internal operations.

#### Computer Programmer II | Department of Social Welfare and Development | Mar 2016 – Dec 2019

- Developed and maintained web applications and internal tools from requirements analysis through implementation and support.
- Resolved application issues, enhanced existing systems, and collaborated with stakeholders to deliver practical solutions.

#### System Support | Solution Base Corp. | Apr 2014 – Mar 2016

- Provided onsite and remote application support, troubleshooting software and database-related issues.
- Conducted user training and onboarding and supported day-to-day application operations.

**Web Developer | Part Time | SkidaxPH | May 2021 – Dec 2021**

- Maintained and upgraded a WordPress website and provided customer technical support and troubleshooting.

**Web Crawler Developer | Part Time | American General Logistics, Inc. | Oct 2020 – Dec 2020**

- Developed a Node.js web crawler for automated data extraction and containerized the application using Docker.

**AI / GENAI**

---

- Completed training in Generative AI, LLM fundamentals, prompt engineering, and responsible AI.
- Hands-on exploration of Gemini API and Vertex AI, with AI-assisted development using GitHub Copilot.

**EDUCATION**

---

**Technological University of the Philippines – Manila**

Bachelor of Science in Computer Science | Jun 2010 – Apr 2014

English (Advanced) | Filipino (Native)
